МІНІСТЕРСТВО ОСВІТИ І НАУКИ УКРАЇНИ

НАЦІОНАЛЬНОМУ УНІВЕРСИТЕТІ “ЛЬВІВСЬКА ПОЛІТЕХНІКА”

Кафедра систем штучного інтелекту

Лабораторна робота №8

з дисципліни

«Алгоритмізація та програмування І»

Виконав:

студент групи КН-108

Зінько Павло

Викладач:

Гасько Р.Т.

Львів – 2018р

Варіант №13

Тема: **"Блоковий ввід-вивід"**

Мета: Робота із двійковими файлами, організація вводу-виводу структурованої інформації і її зберігання на зовнішніх носіях.

Виконати завдання:

13

13.Структура "Спортивна команда":

- назва;
- місто;
- кількість гравців;
- кількість набраних очків.

Знищити всі елементи з кількістю очків менше заданого, додати 2 елементи на початок файлу.

Код:

```
#include <stdio.h>

//main structure of the teams
typedef struct SportTeam
{
	char name[10];
	char town[10];
	int participants;
```

```
        int score;

}SportTeam;

    fclose(fp);
}
```

Результат:

```
~/workspace/ $ make laba8
clang -fsanitize=signed-integer-overflow -fsanit
~/workspace/ $ ./laba8
Enter number of teams
2
Name = madrid
Town = united
Participants = 11
Score = 400

Name = chelsie
Town = kingdom
Participants = 11
Score = 600

The entered teams are:

Name = madrid
Town = united
Participants = 11
Score = 400

Name = chelsie
Town = kingdom
Participants = 11
Score = 600

Deliting the score that is lower than current
Please give me the score

500

Name = chelsie
Town = kingdom
Participants = 11
Score = 600

Enter 2 teams to add them:
Name = barselona
Town = kamboja
Participants = 11
Score = 400

Name = dnipro
Town = mytown
Participants = 11
Score = 500

Name = barselona
Town = kamboja
Participants = 11
Score = 400

Name = dnipro
Town = mytown
Participants = 11
Score = 500

Name = chelsie
Town = kingdom
Participants = 11
Score = 600
~/workspace/ $
